FAQs: Professional Development Hours (PDHs) at SaSS KC

1. What file type will I receive after purchasing a PDH?

All PDH materials are provided in a **Zip file containing an .mp4 video file**.
If your computer does not support .mp4 files, you can easily **convert it to a .mov file** using free online converters to play it in **QuickTime** or other media players.

2. What is the difference between a PDH and an ASHA CEU?

- A **PDH (Professional Development Hour)** is a unit of measure for professional learning activities that qualify toward maintaining your ASHA certification.
- An **ASHA CEU (Continuing Education Unit)** is tracked and approved by ASHA's CE Registry.
- Choosing PDHs allows us to keep your costs lower by avoiding ASHA's rising fees for CEU providers.
- You can read more about these differences on [ASHA's website](#).

3. Will my PDHs automatically upload to ASHA's CEU Registry?

No, PDHs are **not automatically reported** to ASHA. Participants are responsible for **documenting and tracking their own hours** according to ASHA's certification maintenance standards.

4. How do I document my participation in a PDH course?

You will receive a **completion certificate** after finishing your course. Keep this certificate and add it to your personal records for reporting during your certification renewal.

5. Can I use PDHs toward my state license renewal?

Every state has its own requirements for license renewal. Please check with your **state licensure board** to determine whether PDHs qualify for credit in your area.

6. Why did SaSS KC choose to offer PDHs instead of ASHA-approved CEUs?

We believe that **affordable professional development** is essential. ASHA's increasing fees for CEU providers often raise costs for participants. Offering PDHs allows us to deliver high-quality education at a more accessible price without compromising your learning experience.
